

# Snell *Performance Series* IW-SR7

## Versatile Flush-mount Surround Select for Diffuse or Direct Operation

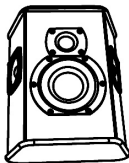

The IW-SR7 is a high-performance, surround speaker with a selectable radiation pattern. IW-SR7 can be either a diffuse dispersion pattern dipole or can radiate with a wide dispersion direct-pattern. In the diffuse mode, the IW-SR7 directs its energy away from the listening area, performing like an array of movie theater surround speakers. This creates a diffuse, lifelike ambient sound field. In the direct mode the IW-SR7 functions as a wide dispersion direct radiator, perfect for localized surround effects or wide coverage front channel use. Voiced to match all Snell speakers, the IW-SR7 mounts flush and virtually disappears in the listening room.
