OPERATING

OPERATING YOUR RICE COOKER

Before first use, remove all promotional labels and any packaging materials and wash the non-stick removable cooking bowl, steaming tray and glass lid in hot soapy water, rinse and dry thoroughly.

HOW TO COOK RICE

Step 1

Use Rice Master measuring cup provided to measure required quantity of rice (refer to cooking tables on page 13). Always measure level cups, not heaped (Fig 1).

Fig. 1

NOTE

1 level Rice Master measuring cup = 140 grams uncooked rice

1 level Rice Master cup uncooked rice = 2 Rice Master cups cooked rice (approx.)

The maximum quantity of uncooked white rice to be cooked = 8 Rice Master cups

The minimum quantity of uncooked white rice to be cooked = 2 Rice Master cups

Step 2

Place measured rice into a separate bowl and wash rice by rinsing with cold water to remove any excess starch. The rice is ready for cooking when water runs clear from the rice.

Step 3

Ensure the exterior of the removable cooking bowl is clean before placing it in the outer housing, this will ensure proper contact with the inner cooking surface. (Fig 2).

CAUTION!

Fig. 2

1. Before starting to cook, clean the bottom of the inner pot and the surface of the heating plate.

2. To ensure the pot is sitting flat on the heating plate, turn the pot clockwise and anti clockwise inside the rice cooker.

3. The pot must be properly positioned inside the rice cooker or the unit will not work and may become damaged.

To reduce the risk of electric shock, cook only in the removable inner pot.

DO NOT IMMERSE THE COOKER IN WATER.

Step 4

Add washed rice to the removable cooking bowl, ensuring rice is spread evenly across the bottom of the bowl and not heaped to one side (Fig 3).

Fig. 3

Step 5

Add water using the following ratios:

White Rice = 1 Rice Master measuring cup water : 1 Rice Master measuring cup rice

Brown Rice = 1½ Rice Master measuring cups water : 1 Rice Master measuring cup rice

(Refer to table on page 13 for more information)

Step 6

Place glass lid into position.

Step 7

Plug power cord into a 230V or 240V power outlet and then switch the power on at power outlet. The amber 'Warm' light will illuminate.

Step 8

To commence cooking, depress the Selector Control. The red 'Cook' light will illuminate.

Step 9

When cooking is complete, the Rice Cooker will automatically switch to the 'Keep Warm' setting. The amber 'Warm' light will illuminate.

Step 10

Open lid and turn rice over with serving spoon provided. Replace lid and allow rice to stand for 10-15 minutes before serving. This allows any excess moisture to be absorbed, resulting in a fluffier rice texture.

NOTE

Rice can be kept in the automatic 'Keep Warm' setting for up to 5 hours.

Do not remove glass lid until ready to serve (except for when turning over rice after cooking is complete or as suggested in the recipes).

To stop the 'Keep Warm' setting, switch off at the power outlet and then unplug power cord.

IMPORTANT

- *Always place liquid into removable cooking bowl, or be ready to add oil, butter or margarine, before depressing the Selector Control to the 'Cook' setting.*
- *Never try to force the Selector Control to stay in the 'Cook' setting after it has automatically switched to the 'Keep Warm' setting.*
- *Do not interfere with automatic Selector Control during operation.*
- *To prevent scratching non-stick surface of the removable cooking bowl or steaming tray, always use wooden or plastic utensils.*

WARNING

Always lift and remove lid carefully, angling it away from yourself to avoid scalding from escaping steam.

RICE COOKING TABLES

for your Breville
the Set & Serve

RICE COOKING TABLES

The Rice Master measuring cup provided with your Breville Rice Cooker is used in the following tables.

NOTE

The Rice Master measuring cup is not a standard metric measuring cup.

1 Rice Master measuring cup is equal to 140g of uncooked rice and 175ml of water.

1 Australian standard metric measuring cup is equal to 200g of uncooked rice.

If your Rice Master measuring cup is lost or misplaced, use another cup but maintain the same cooking ratios and ensure you do not exceed the 8 cup maximum line in the removable cooking bowl:

White rice = 1 cup water to 1 cup rice

Brown rice = 1½ cups water to 1 cup rice

SUGGESTIONS & TIPS

THAT'S THE IDEA™

Add a little extra water for fluffier rice and a little less water for firmer rice.

Washed rice will have some extra water adhering after rinsing. This extra water will extend the cooking time slightly. Reduce the measured amount of water to compensate, if required.

Some rice varieties may require more water for cooking, such as wild rice blends, Arborio rice or short grain rice. Follow the directions on the packet or use the brown rice cooking table.

Due to the additional water needed to cook brown rice, some starchy water bubbles may rise to the lid while cooking. For best results, wash brown rice before cooking and allow to stand on the 'Keep Warm' setting for 20 minutes after cooking to absorb the remaining moisture.

RICE VARIATIONS

for your Breville
the Set & Serve

RICE VARIATIONS

SAVOURY RICE

Prepare rice in the Rice Cooker as specified, substituting all the water with the same quantity of chicken, beef, fish, or vegetable stock.

SWEET RICE

Prepare rice in the Rice Cooker as specified substituting half the water with apple juice, orange juice or pineapple juice. Cooking rice with milk or cream is not recommended as it will burn onto the bottom of removable cooking bowl.

SAFFRON RICE

Add $\frac{1}{4}$ teaspoon of saffron powder or 2 saffron threads to every 2 cups of water. Use white rice cooking tables. Mix well.

ARBORIO RICE

Arborio rice is short round-grained pearly rice often used for Italian risotto cooking. Use brown rice cooking tables.

JASMINE RICE

Jasmine rice is fragrant long grain rice. Use white rice cooking tables.

BASMATI RICE

Basmati rice is an aromatic long grain rice. Use white rice cooking tables.

WILD RICE

It is not recommended to cook wild rice alone in the Rice Cooker as it requires a substantial amount of water. It is possible to cook wild rice as a blend with white or brown rice.

STEAMING

in your Breville
the Set & Serve

STEAMING

Steamed foods retain most of their nutritional value when cooked in the Rice Cooker. Foods may be steamed by placing food in the steaming tray over stock or water and covering with the glass lid. Keep the glass lid on while steaming food unless the recipe or chart specifically states to remove the lid. By removing the lid unnecessarily steam is lost and the cooking time will be extended.

1. Measure 3 Rice Master cups or more of water or stock into the removable cooking bowl. Use up to a maximum of 6 Rice Master cups of water.
2. Place food to be steamed directly onto the steaming tray and insert into the removable cooking bowl. (Refer to the Steaming Charts on pages 19-21 for approximate cooking times).
3. Place removable cooking bowl with steaming tray into the outer housing and cover with glass lid.
4. Plug power cord into a 230V or 240V power outlet and then switch on. The amber 'Warm' light will illuminate.
5. Push the Selector Control down to begin cooking. The red 'Cook' light will illuminate.
6. When steaming is complete, the amber 'Warm' light will illuminate. Remove foods from the Rice Cooker. If further steaming is required ensure sufficient water is in the removable cooking bowl. If not, add more hot water or stock.
7. Turn the Rice Cooker off at the power outlet and then unplug power cord. Allow to cool before cleaning.

NOTE

Do not let the removable cooking bowl boil dry during steaming. Hot liquid can be added during the steaming process.

WARNING

Always lift and remove the lid carefully, angling it away from yourself to avoid scalding from escaping steam.

HINTS & TIPS

for your Breville

STEAMING VEGETABLES

- Smaller pieces will steam faster than larger pieces.
- Try to keep vegetables to a uniform size to ensure even cooking.
- Fresh or frozen vegetables may be steamed.
- If steaming frozen vegetables, do not thaw before cooking.
- The size and shape of vegetables, as well as personal taste, may call for adjustments to the cooking time. If softer vegetables are required, allow extra cooking time.
- Do not allow water or stock to reach the steaming tray. The steaming will not be effective.

CARE & CLEANING

for your Breville
the Set & Serve

CARE & CLEANING

Switch the Rice Cooker off at the power outlet and then unplug power cord. Allow all parts to cool before removing power cord removable cooking bowl. Wash removable cooking bowl, steaming tray and glass lid in hot, soapy water, rinse and dry thoroughly.

Breville does not recommend that any parts of your Rice Cooker are washed in a dishwasher as harsh detergents and hot water temperatures may stain or distort the removable cooking bowl and accessories.

Do not use abrasive cleaners, steel wool, or metal scouring pads as these can damage the non-stick surface.

The outer housing can be wiped over with a damp cloth and then dried thoroughly.

THAT'S THE IDEA™

If rice has cooked onto the bottom of the removable cooking bowl, fill the bowl with hot, soapy water and leave to stand for approximately 10 minutes before cleaning.

WARNING

Do not immerse the outer housing or power cord in water or any other liquid as this may cause electrocution.
