## **Function Description:**

---

Welcome! Thank you for purchasing the CURTIS VR223

With this digital video camera, you can take 640 x 480 resolution (VGA format) videos and 300,000 pixels of still photos. With the playback function you can play back the taken video or photos with this digital video camera. In addition, you can download the videos and photos from the VR233 to your PC. The illustrations in this user manual are to visually detail the operation of the VR223.

## **Notice for use:**

---

### **General:**

1. Never open the housing of the digital video camera as some parts may cause electric shock.
2. Moisture, pressure, collision and heat may damage this digital video camera.

### **Memory and storage:**

1. SD can be used, with a maximum capacity of 4GB.
2. When buying an SD card, take the digital video camera with you to ensure compatibility.
3. SD cards have a write-protect switch, which can be used to prevent accidental deletion of data. When this switch is pushed to the bottom and locked, the data in the card will be protected. However, when the card is in write-protect state, it cannot be used for shooting or deletion, etc.
4. These memory cards should not be used for permanent storage of data. Files should be transferred and stored in your computer or an external storage device.

5. When storing documents onto the memory or the memory card, make sure that the size of the documents does not exceed the capacity of the memory.

### **Maintenance and care:**

1. To clean the lens, blow away the dust on its surface, then use proper cloth or tissue for optical devices to clean the lens. If necessary, use lens cleanser.
2. Never touch the lens with fingers.
3. When left idle for long periods of time, take out the battery and keep in a dry and dark place.

### **Other notes:**

1. When switching image output between LCD display and video devices, be sure to exit from the play or record state.
2. Never keep the digital video camera in an extremely hot or damp environment.
3. TV programs, movies, music, images and other resources may be protected by copyright; therefore, without prior permission, the shooting/use of these resources may violate copyright laws and regulations related. Please note that the resources under the protection of copyright can be used within the permission of related laws and regulations.

## **System requirements:**

---

Below are the minimum requirements that your computer needs to operate files for the software included:

Operation System	Microsoft Windows Me, 2000,XP, Vista*
CPU	Above Intel PIII667 or CPU of equal performance
Memory	Above 128 MB
Sound card and display card	DirectX8 or above
CD-ROM	4× speed or above
Hard Disk	300 MB or more useable space
Other	One standard USB 1.1 or USB 2.0 port

\* The VR223 is compatible with all Mac OS.

## 2. Basic operation

## 2.1 Battery Installation

Slide down the Battery Cover and insert two new AA alkaline batteries. Align with correct polarity of battery terminals. Close Battery Cover.

## 2.2 Use SD card

Insert the SD memory card into the SD card slot. Push it down until the card stays latched. Do not force – check card's position according to the position mark on the camera.

Push and release inserted card if you wish to remove or replace the card.

Turn your camcorder OFF before inserting / removing the SD Card.

- Note that the SD Card has a tiny LOCK switch on the side. Set the switch to un-LOCK position to be able to record videos and take still pictures.

## 2.3 Power on/off

In power-off state, press and hold the power key (⏻) to power ON the camera.

In power-on state, press the power key (⏻) to power OFF the camera.

In power-on state, if you leave the camera idle for 1 minute it will power off automatically.

In power-on state, when battery level is very low, the red  icon on the bottom left of the screen will flash and the camera will turn off after one second. You must replace the batteries.

## **2.4 Change mode**

After powering on, the camera will always enter video record mode, press mode key to change mode between video record and capture.

In video record or capture mode, press left key or right to enter playback mode.

Press Mode key to exit playback mode and return preview mode

## **2.5 Change resolution**

You can select High or Low resolution for recording videos or taking still pictures.

Slide the Resolution Switch located on camcorder's side and select desired position.

LCD screen will display "Hi" or "Lo" indicating selected resolution.

## **2.6 Record Video**

In video record mode, press shutter key () to begin video recording, press the shutter key again to stop recording.

Press up key or down key to zoom in or zoom out the image.

In playback mode, press Shutter key to start or stop video.

## 2.7 Take a Picture

In capture mode, press the shutter key to take a photo.

## 2.8 Play back videos and photos

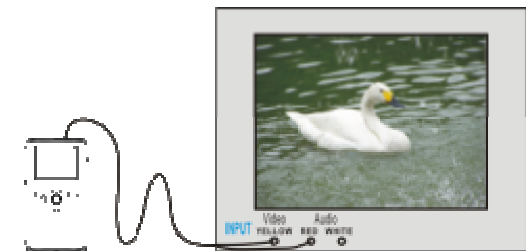

In playback mode, press left or right key (○) to select a file.

Press Shutter key to begin/stop play video, and press up key or down key to on a photo.

- When the inserted memory card is full, the LCD will display "Memory Full," then the camera will stop recording automatically.
- If the SD card is locked, when you press the Shutter key, the LCD will display "Card Locked" and the camera will not record.
- Before insertion or removal of card, please turn off the camera first. In power-on state, the camera will automatically shut down if the memory card is removed.

## 2.9 TV output

After the camera is powered on, insert the terminal of the TV cable into the TV output port of the camera, and yellow port of the other terminal should be connected to VIDEO IN

port of TV, red (or white) port of the other terminal should be connected to AUDIO IN port of TV.

### **2.10 Delete files**

Press the delete key once to display "Delete File?" Press the delete key again to carry out deletion. Press any other keys to cancel the deletion.

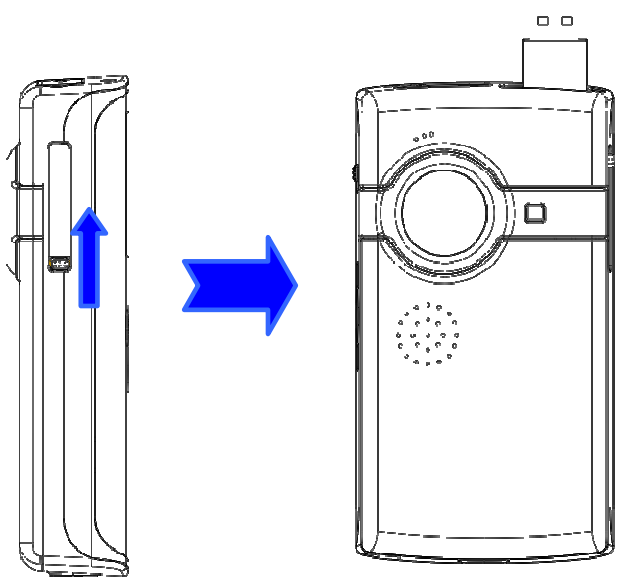

### **2.11 Connect to PC**

1. Slide the USB Switch UP to extend the USB connector and turn the camcorder ON.
2. Insert camcorder USB connector into computer's USB port, or use supplied USB extension cable to make the connection.

### **2.12 Download files from camera to PC**

1. After connecting to a PC, go to "My Computer" and open the "Removable Disc." The photos or videos will be saved in the DCIM\ 100MEDIA folder in the removable disc. Choose the desired photo/video in the 100MEDIA folder and copy (drag with mouse) it into the target folder in the hard drive of the computer.
2. You can use ArcSoft VideoImpression, PhotoImpression and MediaImpression to edit videos and photos.
3. ArcSoft VideoImpression, PhotoImpression, and MediaImpression can be installed

from the CD included with this device.

▲ Open USB port

▲ Connect camera to PC (1)

▲ Connect camera to PC (2)

## Application of Attached ArcSoft PhotoImpression, VideoImpression and MediaImpression:

There are three software applications provided on the CD for image processing: PhotoImpression, VideoImpression, and MediaImpression.

### **Introduction interface for software installation**

Put the CD into the CD-ROM of the computer, then the following menu will occur:

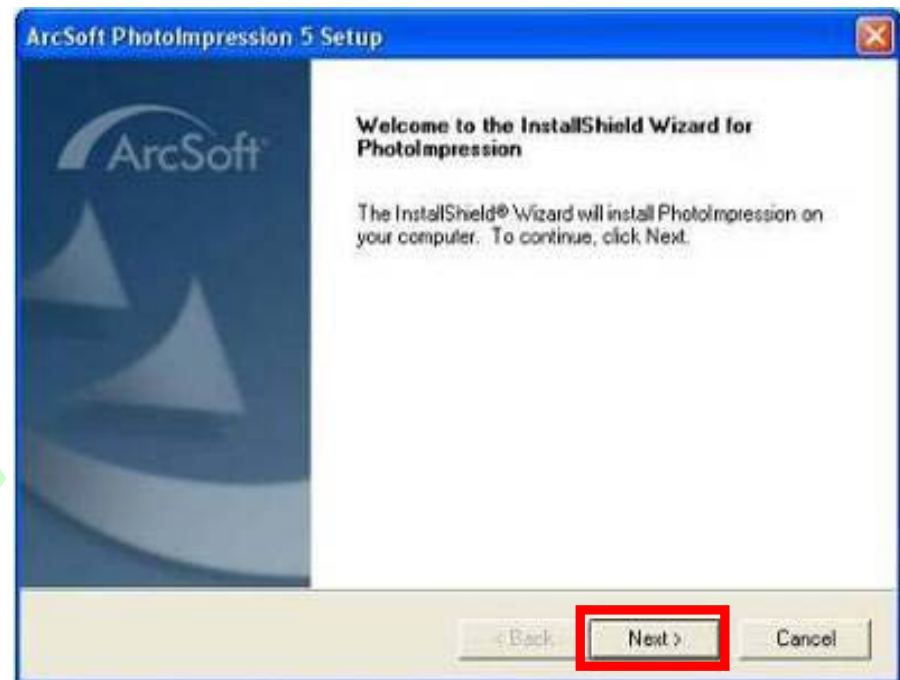

If the CD driver does not automatically carry out or close such function, please click **autorun.exe** program under the root directory of the CD.

## PhotoImpression 6 Installation and Use:

### *Install PhotoImpression6:*

Click “Install PhotoImpression” button, complete the installation as instructed.

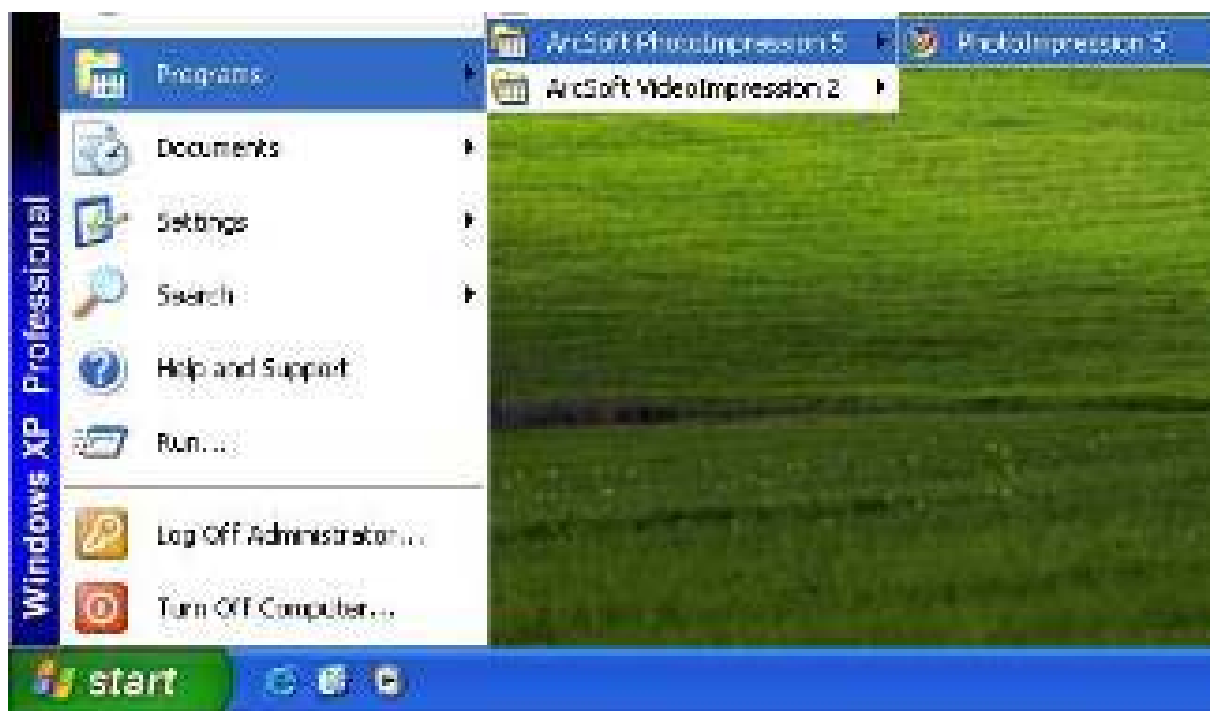

After installation, please restart the computer.

*Run PhotoImpression6:*

Double click  icon on the desktop, or open PhotoImpression 6 via “Start→ Programs”.
