Odyssey™ | removable hard disk storage system

secure. fast. expandable.

Imation Corp. is the only company in the world solely focused on the development, manufacture and supply of removable data storage products spanning the four pillars of magnetic, optical, flash and removable hard disk storage. Imation has more than 50 years of data storage leadership, beginning with the development of the world's first computer tape. Today, Imation is the world's leading provider of removable data storage products designed to help customers create, protect and retrieve valuable digital assets.

We've made it easy for small offices and home offices to secure, protect and access data.

How would lost data affect your business? It's a situation no business owner wants to be in. The Odyssey™ Removable Hard Disk Storage System from Imation is designed to help small offices and home offices meet the escalating challenges of data protection by providing fast backups, accurate restores and full disaster recovery with minimal effort and no technological expertise.

The Odyssey system consists of a docking station, removable rugged cartridges with embedded 2.5-inch SATA hard disk drives and a full version of EMC® Retrospect® backup and recovery software. It's a powerful combination; one that delivers the many benefits of hard disk storage, including ultra-fast and high-capacity automatic backup, superb security features and immediate access to data. And while the Odyssey system stores data in capacities up to 320GB, it won't stop there. It's designed to accommodate higher capacities as they become available.

But for all of the robust data protection the Odyssey system provides, it's surprisingly easy to use. Install the hardware and software, select the desired backup schedule and start protecting your servers, applications, desktops and notebooks. It all adds up to an efficient, effective solution that will protect the information vital to the success of your business well into the future.

The Odyssey Removable Hard Disk Storage System includes:

- Docking station using a USB 2.0 interface
- USB cable
- External universal power supply
- Full version EMC Retrospect backup software
- Odyssey system utility software
- One Odyssey cartridge (80GB, 120GB, 160GB, 250GB or 320GB)

The ergonomically designed Odyssey system is compact and solidly built. It's ideal for high-security storage applications, entry-level backup, large-volume projects, small business archiving, music, movies, photography, records of all kinds, categorizing projects by cartridge and more.
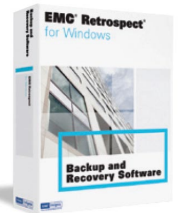

Designed to be used with next-generation cartridges, ensuring a smart investment for years to come.

The docking station is at the heart of the Odyssey system, and for a very forward-thinking reason. It's designed to work with the higher-capacity hard disk cartridges of the future, products that haven't even been developed yet. Unlike tape drives, which lack future format capabilities, you'll be able to use the Odyssey docking station as next-generation cartridges enter the market, ensuring reliable, cost-effective data protection for years to come.

Imation currently has 80GB, 120GB, 160GB, 250GB and 320GB capacities available. As drives become available, Imation plans future product line expansions to include 500GB and beyond.

AES encryption protects sensitive information and meets compliance requirements.

It's not surprising that EMC Retrospect backup software has earned top awards and broad industry acclaim. It's the first backup and recovery software to receive government certification for 256-bit AES data encryption on backup media, enabling you to meet stringent compliance requirements and prevent unauthorized access to information. Multiclient functionality enables efficient backups of multiple computers through a networked workstation. And password protection provides yet another level of security for sensitive information, including credit card transactions, Social Security numbers, and medical and bank records.

Odyssey removable hard disk cartridge capacities continue to evolve as hard drive technology advances.

Built to withstand shock and electrostatic discharge.

When we say that the Odyssey system is designed to ensure data security from the inside out, we're not kidding. Odyssey hard disk cartridges are built to withstand a 900 G-force shock, the equivalent of being dropped from one meter onto a concrete surface. And that's not all. The cartridges also mitigate data loss caused by static buildup. They've been tested to validate data integrity in the event of electrostatic discharge experienced during normal handling and transport.

The benefits of hard disk. The portability of tape.

Hard-disk technology is the gold standard for speed and convenience, precisely the benefits the Odyssey system affords. The system also ensures that accessing data is almost instantaneous, thanks to drag-and-drop file access that makes moving and manipulating data as easy as the click of a mouse. Imation offers both an internal and external docking station so no matter what your application, there is an Odyssey system available to meet your needs. And, unlike tape drives which you have to replace, you don't have to invest in a new Odyssey docking station when cartridge capacities change, thus lowering your overall cost of ownership. What's more, Odyssey hard disk cartridges are small enough to fit into a pocket, enabling you to readily secure, access, transport and store large volumes of data.

The Odyssey internal USB docking station will fit into a floppy disk bay allowing users to free other bays for optical drives or additional hard disk drives.

Keep your assets working for you with total data protection.

Few things are more central to the success of your business than the information you've acquired, so don't risk losing it to user error, computer viruses or failure, or an unforeseen disaster. Put the Odyssey Removable Hard Disk Storage System from Imation to work for you and enjoy the best in secure, fast, expandable data protection.

You'll benefit in every way:

- Forward and backward capability
- Award-winning EMC Retrospect backup software
- Shock protection
- Electrostatic discharge
- Speed and convenience
- Rugged and reliable
- Multiclient

The Odyssey system is the smart, easy way to protect your data from disaster, including theft, loose cables, power failures, accidental deletion, trauma due to a drop or fall, corruption caused by diagnostic tools, computer viruses, fires and floods.

Why trust your valuable data to anything less?

The integrity of your data couldn't be more important, especially if you're working with confidential information. Protect your assets with the Odyssey Removable Hard Disk Storage System from Imation, the company dedicated to delivering imaginative information management solutions for the information age.

ordering information

ODYSSEY SYSTEMS

UPC	Description
26440	Odyssey docking station and 80GB cartridge
26441	Odyssey docking station and 120GB cartridge
26786	Odyssey docking station and 160GB cartridge
26956	TAA-compliant Odyssey docking station and two 160GB cartridges

CARTRIDGES

UPC	Description
26443	Odyssey 80GB cartridge
26444	Odyssey 120GB cartridge
26785	Odyssey 160GB cartridge
26792	Odyssey 250GB cartridge
27108	Odyssey 320GB cartridge
26959	TAA-compliant Odyssey 160GB cartridge

DOCKING STATION

UPC	Description
23492	Odyssey internal 3.5" USB docking station

technical specifications

SYSTEM REQUIREMENTS

	Windows	Linux	Mac
Operating System:	Windows 2000 / 2000 Server / 2003 Server / XP / Vista	Linux 2.6 Kernel or higher	Mac OS X 10.3 or later
Processor:	Intel or AMD CPU rated at 1.5GHz or higher	Intel or AMD CPU rated at 1.5GHz or higher	PowerPC or Intel
System Memory:	512MB RAM	512MB RAM	512MB RAM
System Drives:	CD-ROM / DVD-ROM	CD-ROM / DVD-ROM	CD-ROM / DVD-ROM
Interface:	USB 2.0 port	USB 2.0 port	USB 2.0 port
Software:	Internet Explorer 5.0 or higher, Mozilla Firefox 1.5 or higher, or Netscape 6.1 or higher	Mozilla Firefox 1.5 or higher, or Netscape 6.1 or higher	Internet Explorer 5.0 or Mozilla Firefox 1.5 or higher, or Netscape 6.1 or higher

DOCKING STATIONS

	External USB	Internal USB
Host Interface	USB 2.0 high speed up to 36MB/sec	Internal USB 2.0 high speed up to 36MB/sec
Power Requirements	External universal power supply	Internal PC power
Dimensions	199mm x 133mm x 52mm (7.84" x 5.25" x 2.04")	151mm x 101.6mm x 25.4mm (5.94" x 4.0" x 1.0")
Weight	858 grams (1.89 lbs)	385 grams (0.85 lbs)
Operating Mode	Horizontal	Horizontal or vertical
Warranty	Three year	Three year

CARTRIDGES

Write Protection	Mechanical switch locks cartridge to read-only mode
Electrostatic Discharge	Up to 5000 Volts
Labeling	Write on label for top and front
Shock Protection	900 G-force at 1m
Dimensions	126.5mm x 81.5mm x 21mm (4.98" x 3.21" x 0.83")
Weight	168 grams (6.3 oz)
Operating Mode	Horizontal or vertical (docking station dependent)
Warranty	Three year
